EARN YOUR MANAGEMENT INFORMATION SYSTEMS DEGREE WITH CHAMPLAIN COLLEGE ONLINE

With the complexity of information systems (IS) and the increasing reliance on them to conduct even some of the most basic organizational functions, it's not surprising that IS professionals who hold a Bachelor's in Management Information Systems are in demand. Today's IS professionals need to straddle both technology and business in order to ensure an organization's objectives are met and its goals are achieved.

Champlain College's online Bachelor of Science in Management Information Systems will take your technical acumen to the next level while equipping you with the critical thinking and communication skills needed to grow your career. You'll learn to analyze the information needs of an organization and design solutions aimed at addressing them. And, you will learn to apply project management tools and techniques to help your team complete tasks on time and on budget.

AS A MANAGEMENT INFORMATION SYSTEMS STUDENT YOU WILL:

- > Analyze the information needs of an organization to design and improve the enterprise level information systems needed to meet organizational objectives while taking into account user needs.
- > Use scripting languages and web services to transfer data and add interactive components to web pages.
- > Learn from instruction that emphasizes problem-solving over testing.
- > Effectively utilize database and database management systems to organize, store and retrieve data for use by application software.
- > Administer and secure network systems to ensure a stable enterprise information system environment.
